The Engineering Libraries Division (ELD) seeks papers for the 2013 Annual Conference and Exposition to be held in Atlanta, Georgia, June 23-26. Librarians and educators from around the world are encouraged to submit papers. Topics of interest include, but are not limited to:

- Trends in engineering publishing and scholarly communication including open-access initiatives and novel uses of institutional repositories
- Defining the library’s and librarians’ role in supporting e-Science and data management initiatives: what does it take to be successful and are we prepared for the challenge?
- Integration of information proficiencies with the engineering curricula: traditional and new opportunities
- Defining user assistance in the virtual environment: supporting online courses, MOOCs, best practices for designing online instructional materials, emergence of social networks for research and use of mobile technologies
- Assessment practices for information services
- Building collections for teaching and research: who decides what engineers need?

Both abstracts and draft papers are reviewed using a double-blind process. For updates on deadlines and the submission process, please check [http://www.asee.org/conferences-and-events/conferences/annual-conference/2013/program-schedule/call-for-papers](http://www.asee.org/conferences-and-events/conferences/annual-conference/2013/program-schedule/call-for-papers).

For more information, contact the ELD program chair: Adriana Popescu, Head of Engineering Library, Friend Center, 35 Olden St., Princeton University, Princeton, NJ 08544.
