The **Industrial Engineering Division (IED)** of ASEE seeks papers for presentation at the 2013 ASEE Annual Conference and Exposition in Atlanta, Georgia, June 23-26, 2013. Submissions will be evaluated on their relevance to industrial engineering education, evidence of innovation, technical merit, and demonstrated outcomes. Submissions are welcome from all engineering disciplines.

The IED is a publish-to-present division. Submitted abstracts will be peer reviewed. Authors of accepted abstracts will be invited to submit a full paper for review. Only accepted papers will be presented at the conference. All accepted papers will be considered for award recognition including the **New IE Educator Outstanding Paper Award**, and the **Best Division Paper Award**.

Detailed submission information including deadlines, the Author's Kit with deadlines and instructions, will be available via the ASEE website at: http://www.asee.org/conferences-and-events/conferences/annual-conference/2013. Deadlines have not been established, but typically, abstract submissions are accepted beginning in early September and must be received by September 30. Full-length papers are due in early January, and final paper revisions are required in mid-March.

If you have any questions, please contact the IED Program Chair, Rick Olson, University of San Diego at r_olson@sandiego.edu or (619)-260-6853.
