The DEADLINE for the early bird registration is quickly approaching. Please make every effort to encourage all your colleagues to go online and register for the 2010 ASEE Annual Conference in Louisville before the April 7th cutoff. Start the information flowing now so that no one will be caught off guard and have to pay a higher rate. Also remind people that doing the registration on line saves a considerable amount of money.

Encourage all ASEE members to think about bringing a student to the conference for a $0 cost (as long as the student has a student membership with ASEE.)

Sessions. Mark on your calendar the following times:
- Monday, June 21
  Campus Rep Reception (1712)
  6:30-8:00 p.m.
- Tuesday, June 22,
  Campus Rep Meeting
  2:15 p.m.- 4:00 p.m.

The Continuing Importance of Campus Representatives

In an economic climate where there can be cuts in funding for both a variety of programs and the advocates for important elements of the educational system, we may find that things that are vital to students, staff, and faculty alike are inadvertently misplaced. The individuals who keep a close eye on the quality of teaching at their institutions may be retired and not replaced. Luckily, the Campus Representatives for ASEE at their institutions can provide an enormous amount of support to faculty, students, and staff by keeping all groups apprised of what is happening in ASEE – locally, in the sections, on the national scene, and globally.

Providing this service to the various constituents will help foster good teaching methods, stronger research, and better products (our students.)
New and Seasoned Campus Reps

I have received numerous emails from individuals asking about their campus representatives. The easy answer is that there is a listing of campus reps for the entire country at [http://www.asee.org/activities/organizations/campus/campusReps.cfm](http://www.asee.org/activities/organizations/campus/campusReps.cfm). If by some chance, you get a question from someone who is asking about campus reps or volunteering to help you can direct them to this listing. They may find that there is no one listed for his or her institution. In this case there are a few things that can be done: 1) He or she can go to the dean of the college and ask if someone has been appointed to that job (If someone has been appointed, maybe he or she could volunteer to help with the work of ASEE) 2) if no one has been appointed then volunteering is a good path to take. 3) If your institution’s campus rep has retired or no longer wishes to do the job, then VOLUNTEER. You will find it enjoyable and worthwhile.

Craig Gunn National Campus Rep Coordinator Michigan State University, Department of Mechanical Engineering (517) 355-5160, gunn@egr.msu.edu

Important Information:
1) Campus Representative information can be found at [http://www.asee.org/activities/organizations/campus/index.cfm](http://www.asee.org/activities/organizations/campus/index.cfm)
3) People to know –
   - Tim Manicom Assistant Manager/ Campus Rep Support T.Manicom@asee.org (202) 331-3519
   - Dwight Wardell Department Head/ Great guy who knows all the stories D.Wardell@asee.org (202) 331-3521

Membership Forms - On the final pages of the newsletter are membership forms. This is a repeat from the last newsletter, BUT it is just a hint to keep talking and convincing anyone who isn't a member, YET!

Activities of the Campus Representatives:

CONGRATULATIONS!! To all who filled out the Campus Rep Annual Reports. The response was the best in years. 2009 saw 95 reports submitted in comparison to 2008 with 69 and 61 in 2007. The forms will continue to be perfected to provide both ease in reporting your activities and quality of the information provided.

As an ongoing process, there will be a continuous look at what the reports provide in data. The reports should provide help to you as campus representatives from the collected data across the country. They also should give ASEE a means to recognize jobs well done at your institutions. We are at about one third of the campus representatives reporting at this point. The goal is 100%. If you didn’t submit a report this year, please help out the cause and submit your report for 2010.
Dr. James Plummer announced in his letter of support that Stanford University would be forming a new student chapter of ASEE. He wrote that “This group of very interested students, faculty, and staff who have taken on roles from Officers to Advisors is very interested in furthering engineering education and very excited about the possible events and ideas that they are planning.” Stanford joins 11 other institutions in forming student groups that “focus their effort toward students, faculty and future faculty, and the community with the overarching goal of promoting engineering education.”

These twelve schools are a good foundation for future student groups to be formed at additional institutions across the country. If you are interested in obtaining information on getting a student group started, please see http://students.asee.org/?page_id=102 or contact colleagues at the following schools.
