

2017 ASEE Annual Conference Call for Papers

The **Biological and Agricultural Engineering (BAE)** division of the American Society for Engineering Education (ASEE) invites abstracts and subsequent papers for the 2017 ASEE Annual Conference being held in Columbus, Ohio from June 25-28, 2017.

Topics of interest include, but are not limited to:

- Innovative strategies to enhance teaching and learning
- Integration of diversity and global issues in the classroom
- Design experiences in the curriculum
- K-12 outreach activities based on biological and agricultural engineering related topics
- First-year experiences
- Student recruitment, retention, and placement
- Service-learning and experiential learning
- Best practices for ABET
- Educational issues relevant to the Food, Energy, and Water Nexus
- Innovative use of technology for learning

The division accepts abstracts for 1) Completed works on relevant topics that include data or assessment, and 2) Works-in-progress (does not need to include complete data or assessment). For both tracks, an abstract must be submitted, and if accepted a paper will be requested for peer review. A submission to the work in progress track should include the phrase "Work in Progress" in the title.

The division highly encourages submissions from members and non-members who have not presented at previous ASEE conferences, particularly for the works-in-progress track.

Abstract submissions will begin on September 6, 2016 and will be accepted until October 16, 2016. All abstracts and papers must be submitted electronically via ASEE's Monolith system. You will be able to find submission deadlines, required formats, and other information via the main ASEE website: www.asee.org.
