

Abstract Submission for the 2018 ASEE Annual Conference and Exposition (Salt Lake City, UT) will open **September 5, 2017**. The deadline for submitting abstracts is **October 16, 2017 (23:59 EST)**.

The **WOMEN IN ENGINEERING DIVISION (WIED)** is seeking papers for the 2018 ASEE annual conference. Papers are welcome on topics related to women in engineering, computing and/or technology in the United States and/or globally. This includes outreach and recruitment of K-12 students, innovative retention programs for women undergraduate and graduate students and their assessment. Suggested topics include mentoring, recruitment, retention, leadership and professional development for women faculty and administrators (including work/life balance and dual-career issues), workplace climate, universities' programs, policies or reviews (including Title IX and recent proposed legislation on campus compliance with prevention of sexual violence). Transformative research especially in the social sciences or cognitive sciences that informs the development of impactful and forward-thinking programs and policies are also welcome. Popular sessions at recent conferences have included panels focused on improving the experience of marginalized students on engineering design teams, developing practical skills for men as advocates for gender equity, interactive theater to promote difficult dialogues about inequities in engineering education, managing dual careers, work/life integration issues, and academic leadership strategies. In addition, since it is also the year when ASEE turns 125, papers or panels that trace the history of the Women in Engineering Division or the evolving history of women in engineering are encouraged. If you have ideas for panels and/or would be willing to help organize a panel, please contact the program chair. Panels that can be co-sponsored with other divisions are encouraged.

Authors should submit an abstract of 300 words or less on their paper topic. All ASEE divisions are publish to present. Authors of accepted abstracts must submit a full paper for review and acceptance in order to be included in the WIED program at the conference and in the conference proceedings. Panels must also submit an abstract and may submit a full paper.

For additional information, please contact Sandra D. Eksioglu, WIED Program Chair, Industrial Engineering, Clemson University, 277C Freeman Hall, Clemson, SC-29634, Phone: (864) 6565-7889, Fax (864) 656-0795, seksiog@clemson.edu.
