

Architectural Engineering Division

Call for Abstracts: 2021 ASEE Conference & Exposition

The Architectural Engineering Division seeks abstracts of papers for publication and presentation at the 2021 ASEE Annual Conference & Exposition. Abstracts from academia and industry related to the teaching of architectural and construction engineering, engineering technology and building science are highly encouraged. This division of ASEE has a Publish-to-Present requirement, and both abstract and paper submissions are subject to a blind peer review process.

- Abstract Submission Opens: Tuesday, September 8, 2020
- Abstract Submission Closes: Monday, October 12, 2020
- Notification on Acceptance/Rejection of Abstracts: Monday, November 2, 2020

Topics of interest include those addressing the following themes:

- Structures and Structural Engineering Education
- Construction Engineering Education
- MEP/HVAC Education
- Sustainability
- Integrating LEED content and/or certification into learning outcomes
- Interiors in Architecture and Architectural Engineering coursework
- Instructional Strategies for B.I.M.
- Digital Design and Design Visualization
- Assessment of architectural/engineering courses, programs, instructional methods
- Innovative use of Technology in Classroom
- Service Learning Projects
- Innovative new courses or teaching methods
- Cooperative efforts between education and industry
- International education and teaching experiences
- Integrating research and design
- Co-ops and Internships
- Capstone Design Projects
- Attrition and Recruitment of Architectural Engineering Students

Works in Progress: There is an option to submit papers describing ‘work in progress’ – these are research/design projects not yet complete in their data and conclusions while substantive in content. If submitting a paper of this nature, it must be noted in the title and/or abstract as a ‘work in progress’ to be considered for this category.

While papers submitted are often descriptive, we value research based on quantitative/qualitative methodologies related to architectural/engineering education. Topics that emphasize diversity and inclusiveness in architecture/architectural engineering education are highly encouraged.

Submit abstracts to the ASEE Conference website and specify
ARCHITECTURAL ENGINEERING DIVISION

Submissions must be completed electronically and due dates and times are indicated on the ASEE website. For information on deadlines and guidelines, refer to: <https://www.asee.org/annual-conference/2021> for the upcoming 2021 conference in Long Beach, California, on June 27-30, 2021.

The Author's Kit is located in the Annual Conference section of the ASEE website under ‘Call for Papers’ and has all information needed, from the abstract submission process through paper delivery.
