

Editor-in-Chief, *Advances in Engineering Education*
August 2019

The American Society for Engineering Education (ASEE) seeks applications and nominations for the position of Editor-in-Chief for the journal *Advances in Engineering Education* (AEE - <https://advances.asee.org/>). The anticipated start date for the position is July 1, 2020. This is a volunteer position.

AEE is a peer-reviewed, online archived journal. As an online publication, it defines new means to disseminate documented innovations in engineering education practice through the creative use of multimedia. Authors may utilize such supporting material as animation, audio, graphics and video in addition to text in order to best demonstrate their educational achievements. The journal includes descriptions of innovative curricula, courses, and teaching practices built upon a foundation of accepted learning science principles. *AEE* publishes special issues around particular themes in addition to unsolicited manuscripts. The Journal also publishes selected opinion pieces by engineering educators. By focusing on educational developments and practice, *AEE* complements other engineering education journals, which focus primarily on research.

The *AEE* Editor-in-Chief works with a team consisting of approximately ten associate editors and a small advisory board that establishes and executes processes. Among these processes are establishing and maintaining the editorial standards for the journal, managing the review and publication of papers, expanding global connections of the journal, and participating in events to expand the quantity and quality of engineering education around the world.

Executing these responsibilities requires a commitment of approximately 20 - 25% time from the Editor-in-Chief. The home institution of the Editor-in-Chief is expected to provide editorial support. ASEE is responsible for the typesetting of articles, publishing the Journal online, and archiving the issues and accompanying material.

Applicants should be recognized scholars in engineering education, be active members of ASEE, and be employed by an ASEE member institution.

Applicants for the position should send (a) a cover letter including a summary of relevant experience, (b) a vision statement for the future *AEE* and a statement of their editorial philosophy, (c) a full CV, and (d) a list of three references to Adrienne Troilo, Director of Human Resources for ASEE (humanresources@asee.org). **Applications are due by November 15, 2019.**

In addition, ASEE members may nominate outstanding candidates for consideration. Send nominations to Michael Loui, Chair of the *AEE* Editor-in-Chief Search Committee (mloui@purdue.edu). Nominations are due by October 15, 2019.

The *AEE* Search Committee will review application materials, interview finalists, and submit recommendations to the Executive Director of ASEE, and ultimately to the ASEE Board of Directors. The target date for completing the selection process is April 1, 2020.

Questions regarding the position or the search process should be directed to Michael Loui (mloui@purdue.edu) or to Norman Fortenberry (N.Fortenberry@asee.org), Executive Director of ASEE.
