

ENGINEERING BY THE NUMBERS

BY MICHAEL T. GIBBONS

Engineering bachelor's degrees grew by 5.3 percent during the past year, reaching 78,347 in 2010. This was a marked improvement from the 1 percent total growth from 2005 to 2009, but it had been anticipated based on a 23 percent rise in undergraduate enrollment since 2005. Degree production will increase further in the coming years, since enrollment continued its upward trend in fall 2010, posting a 5.4 percent gain to 450,685.

Many fields sustained their recent growth trends, including aerospace, civil, environmental, mechanical, metallurgical and materials engineering. Chemical engineering degrees continued to rebound from earlier declines, climbing by one third since 2006. The energy-related fields of mining, nuclear and petroleum engineering have also witnessed greater output, jumping by 183 percent since 2003. At the same time, electrical and computer engineering degrees declined for the sixth consecutive year. This latter trend should ebb soon, based on the past three years of enrollment growth in these fields.

Master's degrees reached another all-time high of 43,023 in 2010 due to 16 percent growth over the previous year. This trend will certainly continue, since enrollment grew for the sixth year in a row. Fall 2010 master's enrollment stood at 103,335, which is 25 percent higher than the 2005 mark. Almost all engineering fields fared well in recent years at the master's level. The exceptions might be industrial and manufacturing engineering and the electrical/computer engineering/computer science fields, which have seen little overall growth amid fluctuations since the mid-2000s.

Doctoral degrees dipped by 1 percent last year after three years of virtually identical totals. The 2010 mark of 8,995 engineering doctorates is just 91 short of the all-time high. With eleven consecutive years of enrollment growth, doctoral degree production should remain strong. Most fields have remained steady over the past four years, with the notable exception of biomedical engineering, which has grown by 37 percent. Several other fields have ticked up or down slightly. Electrical and computer engineering stand out among this crowd, dropping by 8.6 percent during this period. The enrollment data indicate that this negative trend is only temporary in these disciplines.

Nonresident aliens increased their share of engineering master's degrees for the third consecutive year, reaching 46.1 percent. However, their proportion of doctoral degrees has declined since reaching a high point of 61.7 percent in 2006. The 54.2 percent of doctorates awarded to nonresident aliens in 2010 is the lowest mark since 2002.

Women received a higher percentage of engineering bachelor's degrees for the first time since 2002, climbing from 17.8 percent in 2009 to 18.1 percent in 2010. Female enrollment edged forward in 2010 for the third straight year, reaching 18.6 percent after hitting a recent low of 17.5 percent in 2007. Female representation at the master's level maintained its decade-long equilibrium. The 22.6 percent of master's degrees awarded to women is slightly below the record 23 percent posted in 2008 and 2009. A higher percentage of engineering doctorates went to women last year than at any time in the past. The 22.9 percent mark set in 2010 is 44 percent higher than the 15.9 percent share posted in 2000.

For this year's survey, ASEE adopted the government-mandated changes to the race and ethnicity fields for permanent U.S. residents. These match the demographics used in the 2010 U.S. Census. At the undergraduate level, the trends are consistent with past years. African Americans received 4.5 percent of degrees, which continued a gradual decline. Hispanic students received a higher percentage of engineering bachelor's degrees for the seventh consecutive year, reaching 7 percent of the total. Asian American representation dipped to 12.2 percent after reaching 14.2 percent in 2004. At the master's level, African American and Hispanic representation both rose slightly to 5.1 and 6 percent, respectively. Asian American awards fell by two-tenths to 14.9 percent. At the doctoral level, African Americans and Hispanics both received 3.8 percent of degrees in 2009. These shares jumped to 4.4 and 5.2 percent, respectively, the following year. Although recent trends pointed in this direction, the change in students classified as Other/Unknown probably pushed these percentages higher. The Other/Unknown representation declined from 17.6 percent in 2009 to 10.7 percent in 2010.

Women comprise 13.2 percent of tenured and tenure-track faculty as of fall 2010. Ten years of increases have slowly raised this mark, which stood at 8.9 percent in 2001. The increases are present at all faculty levels. Growth for underrepresented minorities is less evident. African American faculty members have comprised 2.5 percent of the total for the past four years. Hispanic faculty representation has only grown from 3 percent in 2001 to 3.6 percent in 2010. Asian faculty members have increased steadily each year, reaching 23.9 percent of the total.

More detailed data for 347 U.S. and 11 Canadian engineering colleges can be found in the following pages of our 2010 *Profiles of Engineering and Engineering Technology Colleges* book or online at www.asee.org/colleges.

Michael T. Gibbons is the director of data research and programs for the American Society for Engineering Education. He can be contacted at m.gibbons@asee.org.

DOCTORAL DEGREES BY GENDER, 2010

	2001	2002	2003	2004	2005	2006	2007	2008	2009
Female	16.9%	17.4%	17.4%	17.8%	18.3%	20.2%	20.8%	21.1%	21.2%
Male	83.1%	82.6%	82.6%	82.2%	81.7%	79.8%	79.2%	78.9%	78.8%

DOCTORAL DEGREES BY ETHNICITY, 2010*

	2001	2002	2003	2004	2005	2006	2007	2008	2009
African American	3.9%	3.5%	3.4%	3.8%	3.7%	3.7%	3.6%	3.2%	3.8%
Hispanic	3.3%	3.9%	3.6%	3.5%	3.7%	3.0%	3.5%	3.6%	3.8%
Other	14.2%	11.4%	11.9%	14.0%	14.2%	15.1%	18.7%	19.5%	17.6%
Asian American	13.9%	14.6%	13.4%	14.0%	14.4%	16.6%	12.0%	12.4%	13.2%
Caucasian	64.7%	66.6%	66.7%	64.7%	64.0%	61.6%	62.2%	61.3%	61.6%

* data on ethnicity does not include schools from Puerto Rico or foreign nationals. The percentage of Hispanic graduates is 5.5% if graduates from the University of Puerto Rico, Mayaguez are included. American Indians (0.4%), Hawaiian/Pacific Islanders (0.1%) and Two or More (0.5%) are combined under Other. Six institutions reported virtually all degrees in the Unknown field. These institutions were removed from the calculations for race, ethnicity and residency.

DOCTORAL DEGREES BY RESIDENCY, 2010

	2001	2002	2003	2004	2005	2006	2007	2008	2009
Foreign National	53.8%	54.0%	55.2%	57.8%	59.4%	61.7%	61.6%	58.3%	55.1%
Domestic	46.2%	46.0%	44.8%	42.2%	40.6%	38.3%	38.4%	41.7%	44.9%

DOCTORAL DEGREES AWARDED BY ETHNICITY AND GENDER: 8,995*

* Includes 7 male and 5 female graduates from University of Puerto Rico, Mayaguez. Also includes 6 institutions that counted virtually all permanent residents in the Unknown category.

DOCTORAL ENROLLMENT BY ETHNICITY AND GENDER: 67,369*

* Includes 48 Hispanic male and 25 Hispanic female enrolled students from schools in Puerto Rico. Also includes 7 institutions that counted virtually all permanent residents in the Unknown category.

¹ New discipline added in 2005

Note: ASEE collected enrollment data at the department level until 2004. Enrollment data for 2005 was collected at the degree program level. This method is more accurate. However, some longitudinal continuity is lost between 2001-2004 and 2005. For example, some aerospace data was grouped with mechanical data prior to 2005 because mechanical engineering departments often award aerospace degrees. Consequently, the aerospace total is much larger in 2005. This effect is also apparent for some other disciplines.

¹ New discipline added in 2005

Note: ASEE collected enrollment data at the department level until 2004. Enrollment data for 2005 was collected at the degree program level. This method is more accurate. However, some longitudinal continuity is lost between 2001-2004 and 2005. For example, some aerospace data was grouped with mechanical data prior to 2005 because mechanical engineering departments often award aerospace degrees. Consequently, the aerospace total is much larger in 2005. This effect is also apparent for some other disciplines.

*Enrollment total at the bachelor's degree level is for full-time students.

Forty-three Canadian institutions are currently accredited by the Canadian Engineering Accreditation Board. Eleven of those institutions participated in the 2010 ASEE Survey of Engineering Colleges. The data submitted by these institutions display similar trends as those seen at U.S. institutions. The representation of women is almost identical at the bachelor's and master's level in both countries, while faculty trends for women are also very close.
