

ERM DIVISION CALL FOR PAPERS

The **Educational Research and Methods Division (ERM)** seeks Paper, Special Session, and Workshop proposals on topics related to ERM's primary objectives. These objectives are: promoting scholarly educational research methodologies on learning and methods of engineering instruction; dissemination of knowledge on engineering teaching and learning; encouraging efforts to improve instruction through development of innovative materials and techniques, sound instructional designs, and improved evaluation methodologies; and enhancing the status of teaching in the university and beyond.

There are three types of submissions: Paper, Special Session, and Workshop.

- **Papers:** Manuscripts that further the ERM Division objective stated above. There are four types of papers that will be considered:
 - **Work in Progress (WIP) Paper:** New this year; studies at an early to intermediate stage for which authors are seeking feedback from the community. All WIP papers will be assigned to either roundtable or poster sessions to facilitate discussions.
 - **Research Paper:** Research studies, including relevant prior work and literature citations, methodology, and research results.
 - **Theory Paper:** Review or theory-focused paper; must include relevant prior work and literature citations.
 - **Evidence-Based Practice Paper:** Instruction-focused paper about an educational project and its implications for engineering educators; must include relevant prior work and literature citations, methodology, and assessment results.

The type of paper (WIP, Research, Theory or Evidence-Based Practice) MUST be identified in the first sentence of the abstract. All Papers will be “publish-to-present,” meaning:

- A favorable peer-review of a submitted abstract will lead to an invitation to submit a full paper. A favorable peer review of a submitted paper will lead to acceptance.
 - Only accepted papers will be considered for inclusion in a Conference presentation.
 - Presentation of the paper at the Conference is required for publication of the paper in the Conference proceedings. Formats for presentations are podium, roundtable and poster sessions.
 - All abstracts and papers must be submitted through ASEE's Monolith System.
 - Authors of accepted Research, Theory or Evidence-Based Practice Papers can opt to present in a traditional podium session or in a roundtable discussion session with similarly themed papers. All WIP papers will be assigned to either roundtable or poster sessions to facilitate discussions.
- **Special Sessions:** 90-minute sessions with non-traditional formats occurring during the regular Conference program that explore a topic in depth. Special Sessions should have explicitly stated learning goals that cannot be met in a traditional paper presentation. Special sessions are 90 minutes in length. They do not require a paper submission. A maximum of two ERM Special Sessions will be accepted for the Conference program.
 - **Workshops:** Full day or half-day sessions on the Sunday of the Conference. Workshops provide attendees an opportunity to learn about a topic in depth and ways to apply the knowledge to their own settings.

Guidelines for Submissions

Abstracts and Papers

Abstracts should follow the ASEE Abstract Format guidelines (<http://www.asee.org/conferences-and-events/conferences/annual-conference/2016/papers-management/for-authors>). The abstract should contain sufficient information to enable reviewers to determine its suitability for presentation in the ERM Division. The ERM Division uses a blind review process when reviewing abstracts and papers, and it is the authors' responsibility to ensure that the requirements for blind review are met. Authors' names and institutions should not be included in the text, file name, or document properties of an abstract or paper submitted for review.

There are four categories of submissions: Work in Progress (WIP), Research, Theory, or Evidence-Based Practice. **YOU MUST INCLUDE THE TYPE OF PAPER YOU ARE PROPOSING IN THE FIRST SENTENCE OF YOUR ABSTRACT. (For example, "This research paper describes the study of..." or "This work in progress describes a proposal for studying...")**

- 1) **Work in Progress (WIP):** Studies that are at an early to intermediate stage for which authors are seeking feedback from the community. WIP abstracts should address the motivation and background of the work, methods, results (or anticipated results), and significance.
- 2) **Research:** New findings, situated in the context of prior findings and models, including motivation and background of the work, methods, results, and implications of the work and/or future directions for research.
- 3) **Theory:** Reviews, meta-analyses or other theory-focused work, situated in the context of previous literature to reveal relationships, patterns or models, or extend existing theories. Theory abstracts should address the motivation and background of the work, theoretical framework(s) and sources, and significance.
- 4) **Evidence-based Practice:** Analysis of one or more engineering education practices, including teaching approaches, uses of instructional technologies, institutional strategies to support student success, etc.), including design rationale, assessment methods, evidence of effectiveness and/or achievement of desired outcomes.

The criteria for abstracts listed above serve as the review criteria within each category. Literature citations should not be included in the abstract. Authors' names or institutional names should not be included in the abstract, filename, or document properties. It is the author's responsibility to ensure that the requirements for blind review are met.

Authors of accepted abstracts will be required to submit a full paper manuscript that should meet ASEE Paper Format guidelines (<http://www.asee.org/conferences-and-events/conferences/annual-conference/2016/papers-management/for-authors>). Papers will be evaluated using criteria within each type as listed above, and the general criteria in the list below. Papers that fail to meet all of the criteria may still be considered acceptable based on potential to further the ERM Division objectives.

General evaluation criteria for all paper types:

- The manuscript is complete. Authors should not expect to make substantial changes in a manuscript following its acceptance.
- The study is likely to interest a broad group of engineering education researchers and/or practitioners.
- The work builds upon relevant references and bodies of knowledge.
- The findings or ideas presented are generalizable or transferable to other settings.
- The manuscript is clear and coherent.
- The study is original and innovative.
- The study advances engineering education research and/or practice.

Special Session Proposals

Proposals for Special Sessions submitted through the ERM Division should be sent directly to the ERM Vice-Chair for Programs (lbenson@clemson.edu) and **not** through the Monolith system. ***The deadline for submitting special session proposals is October 9.*** Proposals should include the following information:

- A description of the session, including its purpose, format, learning goals, content, and activities.
- An explanation of why the non-traditional format is needed to accomplish the learning goals.
- A list of presenters/facilitators and their contact information, along with a brief justification for their ability to successfully accomplish the stated goals.

Workshop Proposals:

Proposals for Workshops submitted through the ERM Division should be sent directly to the ERM Vice Chair for Programs (lbenson@clemson.edu) and **not** through the Monolith system. ***The deadline for submitting workshop proposals is October 9.*** Proposals selected by ERM will be forwarded for further consideration by ASEE, which makes the final decision. Acceptance of a Workshop proposal by ERM does not guarantee that it will appear in the final program. Proposals should include the following information:

- A description of the session, including its purpose, format, learning goals, content, and activities.
- A schedule.
- A list of presenters/facilitators and their contact information, along with a brief justification for their ability to successfully accomplish the stated goals.

If the workshop is approved by ERM reviewers, it is then submitted to ASEE. The submission to ASEE will include additional information such as estimated attendance, estimated ticket cost and responsible party to subsidize the expense if tickets don't cover the entire cost of the event (ASEE charges for the room, audio-visual, etc.), expected food and beverage requests, and audio-visual needs.
