2018 ASEE Annual Conference Call for Papers

The Engineering Ethics Division invites abstracts for papers for the 2018 ASEE Annual Conference to be held in Salt Lake City this coming June 24-27. Diverse areas of interest and topics related to engineering ethics are welcomed.

Abstracts should be approximately 300-500 words in length and include the following information: a clear statement of objective, the relevance of the work to ethics, analysis and/or assessment methods, results or findings, and next steps. All abstracts must be submitted via the ASEE Monolith system and will be peer reviewed. Abstract submission opens on September 5, 2017. The deadline for abstract submission will be in mid-October 2017.

The ASEE annual conference has a publish-to-present policy. Only authors of accepted abstracts will be invited to prepare a full paper for peer review, publication in the conference proceedings, and presentation. To be accepted, abstracts (and follow-on papers, if invited) must demonstrate an appropriate level of scholarship.

The Engineering Ethics Division is pleased to accept works-in-progress (WIP) papers to be presented in a poster session. Proposals for works-in-progress papers must include “WIP” in the title of the abstract.

All published papers are eligible for the division’s best paper award. The award will be presented at the division’s business meeting, which will be held during the ASEE Annual Conference. The best paper from the division will be then be considered for best paper award within the ASEE Professional Interest Council IV.

Call for Workshops and Special Sessions:

The Engineering Ethics Division also seeks proposals for ethics-related workshops and special sessions for the 2018 annual conference. Workshops are presentations on an ethics-related topic
of interest to engineering/engineering technology and teaching professionals. Workshops are normally presented on the Sunday immediately preceding the conference. Workshop presenters are required to cover the cost of the workshop and are therefore encouraged to supplement workshop fees with appropriate extramural grants and subsidies. (Please note that even after accepting a proposal, the program chair may cancel any workshop that becomes likely to incur a financial loss to the division.) **Special sessions** can be either a group of four or five related papers on a topic of significance or a panel of several distinguished experts. Please contact the division’s program chair to discuss pre-conference workshops and/or special session proposals.

The Engineering Ethics Division also welcomes and encourages student work. Authors are encouraged to advise the program chair of papers having student authorship.

For more information about the submission process, please refer to the call for papers at: [https://www.asee.org/conferences-and-events/conferences/annual-conference/2018/conference-overview](https://www.asee.org/conferences-and-events/conferences/annual-conference/2018/conference-overview).
