

2020 ASEE Annual Conference Call for Papers

The **Biological and Agricultural Engineering (BAE)** division of the American Society for Engineering Education (ASEE) invites abstracts and subsequent papers for the 2020 ASEE Annual Conference being held in Montréal, Québec, Canada from June 21-24, 2020.

Topics of interest include, but are not limited to:

- Innovative strategies and/or technology to enhance teaching and learning
- Integration of diversity and global issues in the classroom
- Design experiences in the curriculum
- Student recruitment, retention, placement, and first-year experiences
- Service-learning and experiential learning
- Extension engineering education
- Best practices for ABET
- Educational issues relevant to the Food, Energy, and Water Nexus
- New trends in Biological and Agricultural Engineering education
- Diversity, equity, and inclusion practices in the classroom

The division accepts abstracts for 1) Completed works on relevant topics that include data or assessment, and 2) Works-in-progress (does not need to include complete data or assessment). For both tracks, an abstract must be submitted, and if accepted a paper will be requested for peer review. A submission to the work in progress track should include the phrase "Work in Progress" in the title. **The division highly encourages submissions from members and non-members who have not presented at previous ASEE conferences, particularly for the works-in-progress track.**

The division encourages proposals for a panel session or other special format technical session. The proposed session may fall under one of the categories listed above or may be something different of interest to the division. One potential special format is: 5-minute postcard session. If you have other ideas for a panel session, please contact the program chair.

Abstract submissions will begin on September 3, 2019 and will be accepted until October 14, 2019. All abstracts and papers must be submitted electronically via ASEE's Monolith system. You will be able to find submission deadlines, required formats, and other information via the main ASEE website:

www.asee.org.
